WHITE STAR LINE

SOUTHAMPTON and CHERBOURG to NEW YORK

From SOUTHAMPTON		STEAMER	A Special Express Train LEAVES WATERLOO STATION, LONDON, AT	FIRST CLASS PASSENGERS will embark with their baggage at the OCEAN DOCK, SOUTHAMPTON, AS FOLLOWS:	Steamer Sails
Date	Day				
December 1	Wed.	MAJESTIC -	8-25 p.m. (Sun., November 30)	10 p.m. (Tues. November 30)	8 a.m.
" 15	Wed.	OLYMPIC -	9-40 a.m.	11 a.m. and 12-30 p.m.	1 p.m.
" 22	Wed.	MAJESTIC -	9-0 a.m.	10 a.m. and 11-30 a.m.	12 noon

REFRESHMENT FACILITIES ON SPECIAL BOAT TRAINS. Arrangements have been made with the Southern Railway and Western Section for the serving of BREAKFAST and every Great Train from Waterloo to Southampton, in connection with White Star Line baggage, for the convenience of first class passengers. Those wishing to make use of these services should advise either at the London Office of the White Star Line, when mounting, about the express train and suspending railway tickets.

Arrangements have also been made for the serving of LUNCH on the Special Train from Southampton to Liverpool (London, Midland and Scottish Railways). It is important that first class passengers dining lunch should advise at the time of REFRESHMENT FACILITY as to the time and purchasing railway tickets.

For Special reduced rates for the return of passengers from London to Southampton and London to Liverpool see table.

CHERBOURG DEPARTURE. A Special Train with Dining Car leaves the Gare St. Lazare, Paris, in morning of sailing, conveying passengers and their baggage direct to steamer Pier, at Cherbourg. Application for tickets must be made in PARIS AGENCY (Rue Scribe).

The French Railway Office will guarantee delivery by F.M.T. of heavy baggage tendered them on morning of sailing.

In the interest of passengers it is particularly requested that such baggage be referred to the Park Agent at Gare St. Lazare as one of sailing at least.

LIVERPOOL to NEW YORK
Calling at QUEENSTOWN

From LIVERPOOL		STEAMER	PASSENGERS will embark with their baggage at the PRINCE'S STAGE, LIVERPOOL, AS FOLLOWS:-	A SPECIAL EXPRESS TRAIN LEAVES EUSTON STATION, LONDON, BY BRIDGE STATION, LIVERPOOL. CARRYING PASSENGERS ARE TAKEN ACROSS THE STREAM
Date	Day			
December 4	Sat.	MEGANIC -		
" 10	Fri.	DORIC -		10-20 a.m.
" 16	Sat.	CELTIC -		10-20 a.m.
" 24	Fri.	ADRIATIC -	2-30 pm & 4-30 pm	10-20 a.m.
			2-30 pm & 3-30 pm	10-20 a.m.

*On certain dates no steamer
**Leave Gare St. Lazare
QUEENSTOWN EMBARKATION. Passengers joining the steamer at Queenstown are requested to report at the Office of Scott & Co.
(Queenstown), Ltd., White Star Line, the evening before sailing.

The Bus Ticket Mystery

DR JOHN WATSON

AS I TRUDGED UP THE STAIRS at Baker St, my premonition that I would find my colleague, Mr. Sherlock Holmes, with that disgusting pipe in full flame was amply confirmed by my nostrils. I could barely see those hooked features for the fug of blue smoke which filled the room.

"I say, Holmes, whatever do you make of this?", I said, proffering the item I held in my hand.

"Why, is it not a bus ticket?"

He annoys me intensely at times. "Holmes, you are being willfully obtuse. Of course it is a bus ticket. Please turn it over. The question still is 'what do you make of this?'"

"How did you come by it?"

"Mrs. Hudson found it in the gutter on her return from the haberdashery. What do the hieroglyphics mean?"

"It is plain enough on its face", Holmes retorted, coolly blowing smoke towards the ceiling.

"Well it is not plain to me. I do believe I have not seen such a thing since the *Affair of the Dancing Men*".

"Watson, you must get out more – thousands of these are discarded in the city every day. Rather than pandering to your obdurate refusal to use your analytical powers, let me instead challenge them with a question of my own."

"Please do", I said tentatively, fearing that I was walking into a sticky Holmesian trap.

"What was the colour of her hair?"

Whose hair? Mrs. Hudson's? Why auburn of course. Even I could not help but have noticed that after fifteen years."

"No- the colour of the hair of the girl who discarded this ticket."

"Holmes, you really are impossible at times".

"Not a bit of it my dear Watson. The answer lies on the back of this ticket as clearly as the mysteries of the Middle East lie exposed on the parchments of the Dead Sea Scrolls"

"But the Dead Sea Scrolls won't be discovered for another 60 years!", I expostulated.

"Granted Watson, granted. But when they are discovered their message will be as clear as the message on this ticket."

What DO the "Dancing Men" tell us, dear reader?

Port Moresby bus services in 1970 and 2012

STEVEN HABY and MALUM NALU

IN 1970 PAPUA NEW GUINEA (PNG) was still administered by Australia and independence was five years away. Port Moresby was the largest city in PNG and was (and still is) the administrative centre of this country.

To a large extent transport throughout PNG has been hampered by a lack of decent roads and inhospitable terrain with air services contributing to the bulk of options available. Apart from a few mining and military tramways over the years PNG has never had a rail system although from time to time plans have been drawn up for a rail network and even a light rail service in the capital.

Public bus services do operate (known today as PMVs – public motor vehicles) although it is difficult to obtain information about timetables and routes. It was a surprise however when I was fortunate enough to purchase a timetable off eBay for Port Moresby bus services in 1970.

The timetable is undated and the operator shown is Moresby Bus Service Pty Ltd. A disappointing aspect of the timetable (very

much like many Australian rural and regional bus service timetables of the similar period) is a lack of information about the route and fare structure and there is not even a basic map. One also assumes that the buses only operate weekdays although this is not clear.

The design of the timetable is unconventional with the intending passenger having to read across the page. No intermediate times are shown. An interesting feature is the expression ‘Turn town’ – either this refers to the service returning to that destination or running a loop service throughout that area.

The route numbering on initial inspection appears to be based on regions or suburbs however the route numbers sequence allocated to Vabukori (1-1 and 1-2) continues further down the page with 1-3 being the University via Hohola service. An assumption might be that the second digit could be used as a bus number for rostering purposes.

The frequencies on most routes appear to be around 30 minutes in the ‘peaks’ and

hourly for the rest of the day. Some services finish around 9.30-10.00pm in the evening.

Additional services shown as ‘S/B’ in the timetable presumably catered for staff and/or students at the government offices and the university.

It appears that up to 15 buses may have been required to maintain the service. I believe that the Australian government purchased a number of Mee bodied vehicles to be used in Port Moresby in the late 1960s.

Overall an interesting if highly confusing timetable to interpret but nevertheless it is a valuable document chronicling the transport history of PNG.— Steven Haby

The public transport system in Port Moresby (in 2012) is a nightmare, more so at peak hours in the morning and in the afternoon, when students and workers are leaving for work or returning home. Getting on a PMV - short for public motor vehicle - in the city is chaotic- Malum Nalu

The World's Fastest Bus?—or how to write a timetable

JIM WELLS

BELOW, IS A SEGMENT OF A "Bendigo airport service" timetable (undated).

The point is that the towns of Castlemaine and Taradale are about twenty kms apart. Five minutes to cover 20km; 20km in five minutes – really?

Assuming zero dwell time in Taradale we have an average speed of 240km/h for this segment of the journey. Must be quite a trip as even high speed trains struggle to achieve this sort of average. What's the ride like? How does the driver get on when it's raining.

It all becomes a little clearer when we see the full timetable (one journey selected of three), reproduced at right.

The key points would be:

Bookings are compulsory. One wonders how late they can be made but to be on the safe side one would want to make them well before the Bendigo departure time.

The timetable doesn't say so but almost certainly the stops are conditional.

Castlemaine is a long way off the direct freeway route.

The ideal scenario for this type of service for the operator is to be fully booked out of Bendigo – no need to stop anywhere.

Now if there's no booking for Harcourt / Castlemaine but some for Taradale the bus can go straight to Taradale and 7.35 would be a reasonable

time for this stop. The recovery time is in the Malmsbury – Kyneton section.

If there's a Castlemaine stop, Taradale would be reached around 7.50. Why not make this the time?

If this were the time and there was no Castlemaine stop the driver would have three choices.

Leave Bendigo late

Drive more slowly than normal

Dwell at Taradale for recovery (let the passengers look at the famous railway viaduct – on our cover).

All three of these would not appeal to nervous passengers worrying about getting to the airport on time. Airline passengers, particularly international ones, can lose a lot of money if they miss their flights so having hassle free trips to airports is important.

Kyneton is a major town and it makes sense to have any necessary recovery time there- specially if a passenger needs a comfort stop.

This is all rather academic as the current timetable is quite different.

There are a lot of changes but one suspects that the operator found that Castlemaine, being a major centre, required a stop on most trips.

These now take an additional fifteen minutes. Business must be good as there are now seven trips a day in each direction.

Castlemaine and Kyneton are now

Origin	Bus 1
Bendigo Railway Station Bay 1	6.00 am
Harcourt V/Line Bus Stop1	6.20 am
Castlemaine Taxi Rank Mostyn St	6.30 am
Taradale Post Office	6.35 am
Malmsbury Post Office	6.45 am
Kyneton Info Centre JH Park	7.00 am
Woodend Clock Tower	7.15 am
Gisborne By Westpac	7.30 am
Melbourne Airport	8.00 am

fixed stops. Taradale and Harcourt are no longer mentioned, but Kangaroo Flat and Chewton are.

As an aside Chewton is an interesting place. It's a suburb of Castlemaine which has several such places reflecting its history. There was once about 50,000 people in this major gold mining district. Chewton is full of old miners' cottages right beside the road.

The railway station closed in 1975.

Castlemaine Taxi Rank Mostyn St	6.30 am	11.15 am	4.15 pm

When a Time Table changed a Map

JIM WELLS

NSW's CITYRAIL introduced new timetables on October 20th, 2013.

A feature was the reintroduction after many years of Homebush as the terminating station for sector 2 inner west local (all stations) services, replacing Ashfield from this role.

No longer do Bankstown trains do a circuit. Trains from Lidcombe (the second station after Homebush

on the Main Line) for Bankstown will now start from the dead end turnback platform installed some years ago.

Trains going through Bankstown to or from Lidcombe or Liverpool now form their own sub sector with all trains using the City Circle outer track.

That's by the by. The point of our story is that nothing stops at Homebush except the terminators. This means that a passenger from

Homebush travelling to Berala on the Bankstown line south of Lidcombe has to back track to Strathfield and then change at Lidcombe. In the old timetable he had a one train journey.

So, in effect, Homebush has become a branch line stub end terminus. And, yes, CityRail has managed to show it as such, just, on the maps published in the new timetable leaflets (below right).

Melbourne private bus routes as of 1 November 1954- a cautionary tale on historical research with reference to Blackadder.

By STEVEN HABY

Whilst researching Victorian bus routes using the Victorian Government Gazette files on Victoria, available online through the State Library at <http://gazette.slv.vic.gov.au/>, I was very pleased to come across some issues of the Government Gazette that provided some very useful and interesting information.

Once such issue of the Government Gazette was no. 1 of 1955 published on Thursday 6 January of that year, which was devoted to details of all metropolitan and outer metropolitan bus routes licensed by the Transport Regulation Board that operated in Melbourne as at 1 November 1954 (Page 9). These routes were predominately operated by private operators with the remainder operated by the Melbourne & Metropolitan Tramways Board and the Victorian Railways Board.

This Gazette not only listed the routes but also provided details of the operators, fare and section details, service frequencies and deviations such as school or industrial trips. In some cases a basic timetable of the route was set out (see diagram 1). All of this information provides the researcher valuable data and a 'snapshot' of bus routes in operation.

Diag. 1. Extract from p. 39 of the 6 January 1955 Government Gazette showing details of route, sections and fares and the timetable to be observed for route 205A (page 10).

The document lists the routes in three sections. Section one lists all the bus routes operated by private companies in numerical order arranged by the numbering system that was adopted by the Transport Regulation Board in January 1925 whereby:

Routes that passed within 3 miles (9.6 km) of the GPO began at 1

Routes outside this radius but within 8 miles (12.8 km) of the GPO had an 'A' suffix and began at 1A.

Routes that were outside the 8 mile radius were classified as 'country routes' and were initially unnumbered but a new numbering series began in the 1950s at 200A.

Section 2 lists all the routes operated by the Melbourne & Metropolitan Tramways Board which were unnumbered at the time and finally section 3 lists the routes oper-

ated by the Victorian Railways Board.

Many of the routes have long since disappeared or changed substantially over time within the last 59 years since this Gazette was published however as a 'point in time' reference it is fascinating.

"At last!" to quote Lord Percy from Blackadder when he thought he had discovered the process of turning base metals into gold, I thought I too had stumbled across the ultimate (at least for those interested in Melbourne bus routes).

However my initial excitement turns to frustration as a closer reading of the document reveals some curious omissions of certain bus routes which was discovered when cross checking against Graeme Cleak's series of excellent articles on Melbourne bus routes published in Fleetline, Australian Bus Heritage and later Australian Bus Panorama.

Routes 132A to 155A were not listed in the document but are outlined in Graeme's article published in the June 1992 edition Australian Bus Panorama Routes 233A to 274A were also not included in this list however again Graeme outlined these in his article published in the September 1992 edition of Australian Bus Panorama. However as Graeme explained in the latter article many of the routes in the 200A series were not allocated numbers until around 1956 which may explain the omission in the 6 January 1955 Gazette. Such is the challenges of the researcher.

"Bugger!" as Blackadder would often say. So as Baldrick in such situations would say with ill-deserved confidence "I have a cunning plan!" This plan involved further research by going back to the 1956 Government Gazettes and check information indexed under the Transport Regulation Board entry in the indexes. This did disappointingly a fruitless exercise. Some further analysis was required!

However searching the gazettes is quite easy online and one can either browse or do more advanced subject searches. A screen shot of the search functionality is shown in diagram 2. Useful subject headings to select in the 'advanced' search include 'Motor Omnibus Act', 'Transport regulation act' and 'Transport Regulation Board'. Diag. 2 (below). Search screen from Victorian Government Gazette index from the State Library of Victoria.

Reading through the document reveals some interesting operational requirements as set down by the Board for example route 104A North Coburg tram to Broadmeadows tram did not have a set timetable and was authorised to operate between the two terminuses as passenger traffic warranted. It is not sure what the 'trigger point' was in regards to departures so it may have been a long wait for intending passengers further up the road! Despite all the setbacks from my initial research this document (and others) have proved to be a valuable tool for the researcher.

The following tables are a summary of all the private bus routes listed in the 6 Janu-

TRANSPORT REGULATION BOARD.

DETAILS OF METROPOLITAN AND OUTER METROPOLITAN OMNIBUS ROUTES LICENSED BY THE TRANSPORT REGULATION BOARD AS AT 1ST NOVEMBER, 1954.

THE information contained herein has been published for the information of the general public, Municipal Councils and other interested bodies.

It is not possible to set out in detail the complete timetable for each route and for purposes of brevity this information has been condensed setting out the minimum frequency to be operated.

The current detailed timetable for any route can be obtained by application to the operator concerned, the names and addresses of whom appear in the index. Commencing and terminal points of each service are listed in alphabetical order for easy reference. This information may be varied from time to time and amended prescriptions of route and frequencies will be prepared as opportunity offers.

DETAILS OF METROPOLITAN AND OUTER METROPOLITAN OMNIBUS ROUTES—continued.

225A	Box Hill station – Upper Ferntree Gully (Royal Hotel)	Ventura Motors, Box Hill (4)	Route 732
226A	Box Hill station – Burwood tram	Ventura Motors, Box Hill (4)	Route 732

A Camden BS Vulcan with Symons & Fowler body on the Elsternwick to Oakleigh service (627) and a Ventura Leyland RTC with Freighter body at the second stop and the Box Hill-Mordialloc service (700, now 903, and it was only from Sept '66 that this service went via the Centre, previously served only by a Burwood-Old Dandenong Rd supplementary route, discontinued when the main service ran via the Centre). Ventura's stop was outside the donut shop– System Improver, <http://www.busaustralia.com/forum/viewtopic.php?f=10&p=510206>
