# Travel through NSW on \$2.50 per day

MICHAEL VALE

**O**N THE MORNING OF SATURDAY 23 June 2018, I found myself and one other friend on the 08:30 Sydney-bound XPT travelling north from Melbourne to Cootamundra. We then travelled to Bathurst, thence to Broken Hill on the Broken Hill Explorer.

Being a Senior I could have travelled to Albury on a free Seniors voucher and waited at Albury briefly before joining the XPT, but I preferred to catch the XPT from Melbourne to Cootamundra.

However, as a headline-grabber, I decided to say I went to Broken Hill for \$5.00 because we actually travelled from Cootamundra to Bathurst on the Sunday for \$2.50, thence Bathurst to Broken Hill on the 'Broken Hill Explorer' on the Monday, also for \$2.50 and around 9 hours of rail travel...not bad I reckoned.

We had 4 nights in a "quaint"...read "draughty"...miner's cottage in Broken Hill. Because there is NO surface public transport from Broken Hill to Mildura, my 88 year old dad got the Fairlane out of mothballs and gave it a bit of a workout for a 600km round trip from Mildura and return.

The following Saturday saw us on one of the V/Line services from Mildura to Swan Hill to connect with the UP Swan Hill train to Melbourne.

## The details

On Saturday morning, we were on board the lightly-loaded XPT in Car B. At Albury, where the XPT was 5 minutes late arriving, 55 passengers got on. After Wagga and Cootamundra, where we alighted, the 8 car train, including the two power cars, finally left fully booked.

The track to Seymour, riding on the original standard gauge line, was quite good, however there was a marked deterioration after Seymour, which had the cars swaying in some parts of the journey. Speed restrictions between Benalla and Wangaratta slowed us for a while and, around

Barnawartha, the track was just as bad as 18 months ago when I last travelled on the XPT, with lots of bangs, dips and excessive yawing. As previously, the staff were offering 'at-seat' refreshments in an attempt to minimise the numbers of elderly/infirm passengers making their way through the swaying and lurching sitters to the buffet car.

North of Albury, the track improved considerably and the train sat on 160 km/h for long stretches. However some of the curves taken at a slower speed were a bit jerky and I wouldn't have wanted to be on my feet when we hit one of them in particular. There were also some 90 km/h speed restrictions near The Rock. I always marvel at the 1940s built Bethungra Spiral and took delight in explaining the concept of a spiral to my friend Julie who hadn't been north of Albury by train before.

The weather north of Seymour, and apart from Murray River-induced fog at Albury, was beautiful...sunny with slight clouds.

Cootamundra overnight was icy and frosty, but a sunny day, which led me to think about the \$40.00 we paid to

stay in budget rooms in the Central Hotel. The rooms were very primitive compared to more modern hotel rooms. However my outspoken friend Julie asked the management for more blankets to top up the threadbare two which made up the bed in her room. We ended up laden with blankets and eventually the cold, cave-like solid concrete and plaster walls absorbed some of the heat from the split system air conditioner. Eventually the room warmed up a bit—but not before I had a double scotch to knock me out. It was obvious the rooms had not been heated for quite some time and they were easily only about 2°C having absorbed weeks of Southern Highlands frosts! The meals at the Central Hotel were very good though.

Before departing Cootamundra and its beautifully restored station we spent some time at the Cootamundra Heritage Museum, formerly the railway barracks, which was well worth an hour or more visit. We then ambled to the adjacent station and I checked the automated train arrival thingy which was more accurate than the announcements by the station staff. The XPT arrived a few minutes early.

We were then joined by another friend

Sulphide St Museum

who had travelled to Sale the day before on the 'Skyrail to Sale' trip. He had used his free pass to Albury on the 07:05 Albury Express and then purchased a \$2.50 Seniors fare at Albury which got him to Cootamundra then on the coach to Bathurst with us... not bad for 7 hours travel.

The coach left Cootamundra 15 minutes later at 15:55, with 10 passengers on board and followed a circuitous route to Bathurst via Young, Canowindra, Orange and finally arrived at Bathurst at 18:55. I later thought that a journey through these parts in early Spring would be a delight with all the cherry blossoms around Young.

We had travelled to Bathurst on the coach to maximise our rail travel for the next day, i.e. Bathurst to Broken Hill instead of Orange to Broken Hill—an alternative option from Cootamundra.

If we thought Cootamundra was cold, we hadn't felt anything yet. At Bathurst, after finishing our meals at the nearby pub at 10pm the ice was well settled on to the cars and a lazy breeze made the walk back to the modern and well-heated hotel absolutely freezing.

Next morning (Monday) we left our warm, very modern budget accommodation and walked the two blocks to Bathurst station and at 09:30 the frost on car roofs was starting to melt where the sun shone on it, but where the sun wasn't shining, the frosty water was re-freezing down the

sides of the vehicles like stalactites.

A quick Weatherzone check at that time had the temperature still on -1°C.

With our next day's \$2.50 tickets in hand we waited...not long. The 'Broken Hill Explorer' arrived early for a 09:47 departure and tended to keep ahead of the schedule all day which allowed the passengers a few minutes to stretch legs on the platforms of the larger towns.

Between Bathurst and Parkes the track is particularly winding and there are several horseshoe curves. I believe John Holland has some jurisdiction over the track here and the track riding qualities, compared to Victoria's Northeast, are excellent. The Explorer train was travelling between 130 & 140 km/h for literally hours on end. So, compared to Victoria's Northeast, the track from Bathurst to Broken Hill has a FAR superior ride, and it's no wonder, if rumoured, that John Holland didn't want to take on that mess to clean it up.

So far...frosty nights notwithstanding, the weather had been sunny and clear. However, on Monday, the expected temperatures of Bathurst and Broken Hill were the same at 12°C, and the following day Broken Hill was only expecting a top temp of 10°C. So we really were in the dead of winter.

As we travelled along, I had wanted to see the junction at Roto with the line that heads south through Hillston and beyond. However a mistimed red wine had me napping through there ...

DAMN!

Last light after sunset on the journey was 18:00 EST just before Menindee.

We only crossed two freights between Bathurst and Broken Hill, but around dusk according to the driver we sent a few roos and a goat to their maker.

I highly recommend travelling Economy class on the three car Explorer if travelling to Broken Hill. First Class, which occupies the buffet car, was full. The second carriage we were in was half full, and the third car was virtually empty.

We stayed at the 'Hill' in a furnished former miner's cottage for \$100 a night for 4 nights, which worked out to be very economical at just over \$100 each for our stay.

On the train was a cocky (farmer for those not used to Aussie vernacular) who manages a property at Tibooburra and another at Oberon. He told me he used to drive between the two locations, around 2,000 km each way. However, now that he is over age 60, he drives to Broken Hill, stores his vehicle and travels each way, around 900 km for \$2.50 ... now that's assisting him in many ways by making for a safer journey for the farmer, and it helps NSW TrainLink through his buffet car food purchases during the journey etc.

Interesting though that he told me that he only use2 the train, because the coach on other days of the week takes literally HOURS longer.

## Public Timetables that Michael used for his trip

The following day, the weather in Broken Hill could only be described as freezing with a maximum of only 7°C, and June's previous lowest ever maximum for Broken Hill was shattered spectacularly.

Because we had hired a car we ended up going to Silverton via the very interesting Lucky Strike mine which I believe is the only mine still conducting underground tours... the Broken Hill mine tours long having ceased. With its typically Australian

backdrop of saltbush and bare natural rock covered hills, it was great to sit on the veranda in the winter sunshine of the old Lucky Strike office and sip on a cuppa with scones, jam and cream.

We had lunch at the quaint Silverton pub and visited some of the less tacky attractions of the town and we walked along the old perway of the long closed tramway for a while and picked up a few artefacts.

The following day we went to

Menindee Lakes, about 110 km away, which for the most part are very low in their water capacity, which is a concern for the 30,000 residents of Broken Hill.

Whilst staying in town we watched an east-bound Indian Pacific arrive one evening and it waited in the platform whilst around 150 'guests' alighted and caught buses to a nearby hotel for a performance and dinner of a recreation of Priscilla, Queen of the Desert, then around 90 minutes later

they were back on their train and gone.

The next morning we spent a few hours at the Silverton Tramway Museum which also houses the retired [Silver City Comet](#) [see picture of this train in its heyday, below]. It's hoped one day a wealthy benefactor will come along after learning of the significance of the trains and will stump up the cash to restore it and get it operating again...

I wonder if anyone remembers the time the 'Comet came to Melbourne?

Later that same morning, Mr. Vale snr rolled up in the Fairlane and we adjourned for Devonshire tea at the lookout at Broken Earth, the top of the enormous dirt heap in the centre of town.

We set off around midday for the 3+ hour drive to Mildura and whilst we were driving south, adjacent to the highway, was the construction of the water pipeline from the Murray River to Broken Hill which will guarantee domestic water supply whilst simultaneously legitimising the theft of water in the Upper Darling river by the cotton growers to enable them to maximise their profits. The pipe is around 38cm in diameter.

I found it a long drive, even with the road construction speed limits, and I started to get weary and was glad when Wentworth finally approached. After showing my friends the sights of

Wentworth ... the Junction of the Murray and the Darling rivers and the Fergie tractor memorial, we travelled over to Victoria and visited the buffers at the end of the line at Yelta and had a look at the sleepers on that section of recently converted to standard gauge track of the Murray Basin project. Though the screws are in abundance where the rail was moved in and, apart from one glaringly obvious rotten sleeper, it all looked in good shape. Screws resembling coach bolts were used throughout the conversion as they were easier on the old sleepers than using dog-spikes.

Of interest to some may be the \$135 cost @\$1.70 per litre for 98 Octane fuel to run the V8 Fairlane 600 km, compared to approx. \$400 each on the Rex flight.

Next day, we were on the 10:00 bus from Mildura to Swan Hill and I was keeping my fingers crossed there would be a train to Melbourne, because there had been some cancellations on the Swan Hill line recently. The bus left Mildura around 75% full and another 15 "on" at Robinvale had the bus almost full. The sun coming through the clean windows was lovely and I dozed and read my way to Swan Hill.

Swan Hill was reached on time and we had a train instead of a bus, which is a bit of a lottery these days. But the train and its windows were putrid to

the point of being almost opaque with dirt, and it goes to show my letter of 12 months earlier to Minister Allan regards the dirty condition of the train has largely fallen on deaf ears. V/Line is selling a product in its service to/from Swan Hill and it's a very bad look to see the cars presented in such a poor condition.

Being in the ACN car directly behind the N Class loco the passengers in this car, and no doubt the rest of the train, were treated to the very rough stops and starts at each station, with the couplers' crashing sounds as they tightened up and loosened every time there was a stop. It was so bad I spoke to the driver and his pupil at the end of the journey at Southern Cross and told them it was one of the roughest rides I've ever encountered from Swan Hill ... I don't think they comprehended my concerns.

Apart from that, it was an uneventful trip from Swan Hill, but it's amazing the number of passengers the conductor kicked out of First-Class south of Eaglehawk. They were travelling on myki's and weren't prepared to spend the \$8 for the change of class.

So, ended my 2018 round trip to Broken Hill.

# Slow Flight to Melbourne

JAMES T WELLS

**T**HIS ARTICLE IS ABOUT a strange service that operated on trunk routes out of Sydney around 1984.

The timetable below is from the [Ansett Airlines System Timetable](#) of Mar 4, 1984. "Ansett?", you ask. Yes, Ansett was the great private enterprise domestic airline that competed with the government airline (TAA, Australian, Qantas) from the 1950s until 2001. Ansett did have international operations towards the end. Qantas became a public company in 1995.

The original [Ansett Airlines](#) was founded in the 1930s as a direct response to Victorian Government protection of the railways. Mr. Reg Ansett attempted to provide a road coach service from Hamilton to Melbourne. When told he couldn't, he founded an airline.

Much later, he was famous for flying

by helicopter each day from his home in Mt Eliza to the city for work. Thankfully, most of the flight was over water; otherwise he would have been quite unpopular.

In the 1984 Sydney Melbourne timetable, there were two flights a day that look quite oddball – WX867 at 7:50am and WX865 at 5:25pm. They were shown as taking over two and a half hours, compared to the Boeing time of one and a quarter hours. Furthermore, there was an intermediate stop and the aircraft was a small noisy turboprop called an F27 (Fokker Friendship).

"WX" was the code for Air New South Wales, once called [Butler Air Transport](#), and which provided regional services out of Sydney. This airline was wholly owned by the same holding company that owned Ansett.

The background to this is that the [very heavy regulation](#) of the trunk airline

system by the Commonwealth Government started to be relaxed about 1980. This followed international trends. The government regulated routes, fares, aircraft type, meals etc. They didn't regulate timetables but the airlines adopted parallel scheduling which kept the government happy but perhaps not the passengers.

A classic of the government's heavy-handed approach was the insistence that Ansett and TAA should take delivery of their first Douglas DC9's on the same day in about 1965.

Also providing regional services in NSW was [East-West Airlines](#). It wasn't a competitor to Air New South Wales, because different airports were served. For example, on the North Coast, Air New South Wales served Coffs Harbour and Casino. East West served Taree, Port Macquarie, Kempsey and Grafton.

- May 27

Aug 17 -

May 28 - Aug 16

East-West reached the conclusion that they could legally offer interstate services from Sydney, provided the aircraft stopped at an airport in NSW *en route*. The key was cheapness; a low fare would attract passengers who otherwise would travel by road coach or rail, or not at all.

I travelled to Melbourne on an East-West service about this time. The intermediate stop was at Albury; the aircraft landed, taxied to the terminal area, turned around and taxied straight out again to the runway for take off. I wonder if they could have done a touch and go, but almost certainly this would not have been allowed with passengers on board.

[Wikipedia](#): In June 1983 East-West sold return tickets between Sydney and Melbourne via Albury, a journey which took about two hours 45 minutes. The fare (\$120) was about half of the standard fare of \$248 for direct flights by the duopoly carriers whose flight times were one hour 15 minutes.

\$248 for a standard fare translates to about \$800 in today's terms. How things have changed!

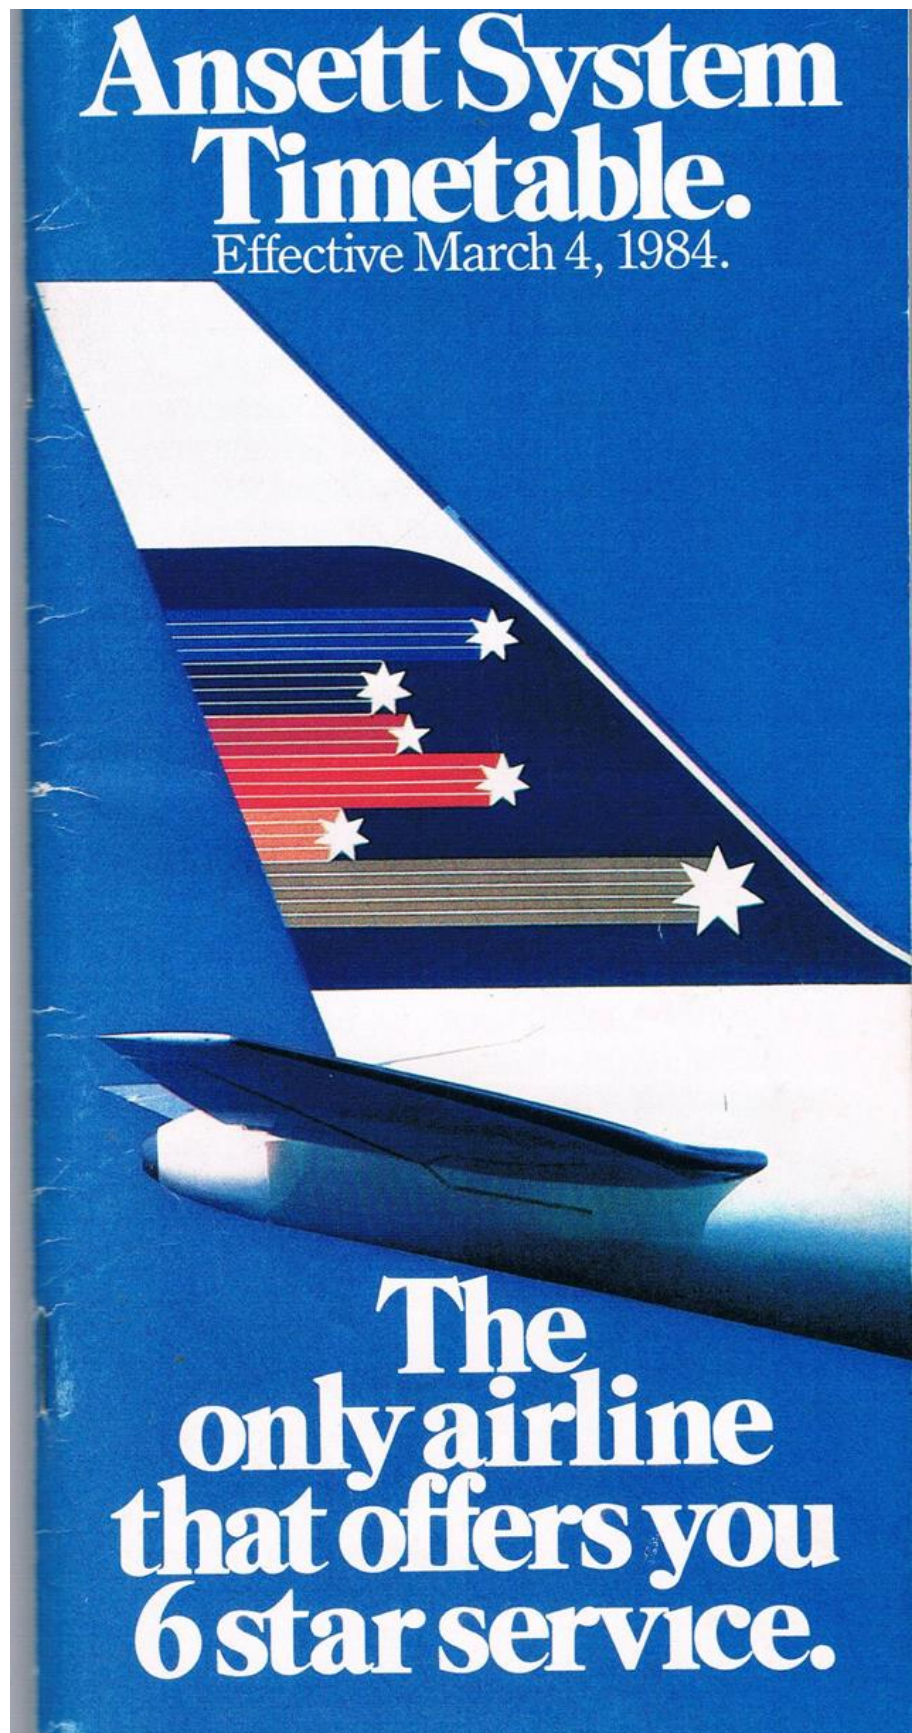

I do not know where Air New South Wales stopped *en route*. Albury would have provided the most direct service, but it was not an airport served by Air NSW. Perhaps they went via Wagga?

Both Air New South Wales and East West also operated stopping services to Brisbane.

In the Ansett timetable of March 1984, [East West](#) is also shown as serving Hobart; I do not know whether this stopped *en route*.

The intermediate stopping F27 flights did not last long. The major airlines responded with fare initiatives that included Standby fares and eventually full [yield management](#) as we have it today.

As an aside, the one hour 15 minute time Sydney to Melbourne for jets in 1984 is much shorter than today's one hour 30 or 35 minute offerings. Reasons for this include Sydney's third runway ("We have a lot of driving to do"), extra allowance for air traffic delays, and slower planes.

**Ansett System  
Timetable.**  
Effective March 4, 1984.

**The  
only airline  
that offers you  
6 star service.**

# An Editorial survey of Railway Public Timetables of Australasia (Part 1– Introduction and NSW 1855-1905)

VICTOR ISAACS

**T**HIS SERIES OF ARTICLES (in some 15 parts between now and mid-2020), is about the publication history of Railway Public Timetables in Australasia and their appearance, rather than about the train services provided.

## Introduction

Since *The Times* first appeared in September 1983, there have been many articles about Australian Railway Public Timetables. This series is an attempt to bring these together and provide an overview. However, there are significant reservations, because there are so many gaps in what we know, especially from the early years. This arises, of course, from the ephemeral nature of Railway Public Timetables. Very few are retained when superseded by new editions. Indeed, very few are in our major public research libraries. There are some collections in the various archives maintained by the State Divisions of the Australian Railway Historical Society and/or in the various State Archives. However, I did not make a continent-wide trip to view these when preparing this series of articles. Some sections of this series are taken from earlier articles by me in long past issues of *The Times*.

Most state-based Archives or Public Record Offices, including National

Archives of Australia, have some holdings of public timetables from the earliest known, up to the era of the 1990s rail reforms. In most cases, there are on-line and paper indexes to these holdings. Some of these collections were inherited from the railway administrations [see tentative list on this page]. In *The Times* of [February 2017](#), Geoff Lambert surveyed the opening-day timetables of most Australian railway systems.

Checklists of Public Timetables of New South Wales were published in *The Times* (August 1998, by Victor Isaacs), Victoria (February 1999, by Graeme Cleak and Graham Duffin) and Queensland (November 1998, by Graham Duffin) – all accessible at <https://www.timetable.org.au/times2.html>. Several more checklists for most other Australasian Railways were published by, or codified by, Geoff Lambert in *The Times* from mid-1999 to April 2001, together with a listing of the then-known timetable archives ([June 2000](#)). All of these checklists have been incorporated in and added to an Australasia-wide checklist by Geoff Lambert in the ATA's [Historical Australian Timetables](#) list.

Hopefully, this series will engender correspondence to fill many of the gaps which I shall note.

This series will concentrate on Public Timetables published by Railway administrations. I will also mention those issued by other publishers, e.g., in Government Gazettes, newspapers, [Bradshaw's Guide to Victoria](#), [Walch's Tasmanian Almanacs](#) and others.

I use imperial measurements until 1974, then metric. I thank Geoff Lambert for his assistance with this introduction and other comments.

## New South Wales (1855-1905)

When the first steam public railway from Sydney to Parramatta opened in 1855 handbill timetables were published. Indeed, this was noted in the press of the day. NSW State Archives has a photocopy of the first handbill. New South Wales was one of those colonies which were so kind as to publish their Railway timetables in their Government Gazettes – thus making them available today on the internet and in major research libraries. In NSW's case, this did not date from its first railway in 1855, but started the next year, from September 1856. The practice continued until September 1888. A sample from 1864 is shown on page 10. In later years, when the Railway system was quite large, these timetables were large and unwieldy. In the final years of publication they are usually large fold-

First tentative list of timetable archives. Apart from NSW, there is no "one-stop shop" for these. The list will be progressively updated each month as the Editor comes to grips with it. In the digital versions of *The Times*, these will be hidden hyperlinks. When searching indexes of holdings in libraries or archives, it may be necessary to try any or all of the following "exact terms": *timetable*, *time table*, *time-table* and the plurals of each of those.

GREAT NORTHERN RAILWAY.

Department of Public Works,  
Sydney, 21st April, 1864.

His Excellency the Governor with the advice of the Executive Council, has been pleased in pursuance of the Act of Parliament, 22 Victoria, No. 19, to approve of the following Time Table for the Great Northern Railway, including the Morpeth Branch, made by the Commissioner for Railways under the provisions of the said Act—to take effect from the first day of May next.

ARTHUR T. HOLROYD.

Time Table for May, 1864, and until further notice.

\* Trains will stop at Wollombi Road, by Signal only.

Platforms at which Passengers will be taken up and set down if required:—Falkner's, Belford, Allandale and Woodford.

(L.S.) JOHN RAE,  
Commissioner for Railways.

Fig. 1 NSW Government Gazette May 1864

out documents. Manifestly, they are copies of the wall-sheet timetables posted up at stations. Their unwieldy nature by 1888 is probably why they were dropped from the Government

Gazettes. NSW Government Gazettes have now been digitised and are available on the National Library of Australia's magnificent [Trove](#) service.

A privately published venture was *Monthly Railway Guide Steamer and Bus Time Table*, of which I have sighted a copy dated 1 May 1877. This is 34 pages, 4 x 5 inches, of railway and Sydney ferry and horse bus timetables.

Between 1879 and 1882, the Sydney afternoon newspaper, *The Echo*, in its expanded Saturday edition, published railway timetables. These rotated around the various lines, so that over about three weeks, the whole NSW system was covered.

In later years, before they ceased in 1888, the Government Gazette timetables often said something like "For more information, see Book time-tables". Without a doubt, these would have been the main source of timetable information for travellers in this era. I have seen an incomplete photocopy of an edition dated 14 June 1883 entitled *Government Railways Time Tables and Fares Great Southern, Western, Richmond and Northern Lines*. This was 40 pages, 6.5 x 8 inches, of timetables, fares, connecting coaches, conditions of travel and a map. It is known that the NSW Public Timetable was published frequently from 1 January 1889, but probably from an earlier date. From the early twentieth century, I have been able to sight almost every NSW Public Timetable.

The edition of 7 May 1905 comprises 210 pages, 4.5 x 5.5 inches [our pages 11-15]. The front cover is an attractive montage of scenic views accessible by train. This cover was used for many years. There is a fold-out map. On one side the NSW Railway system is shown, and on the other railways of Australia. In subsequent editions, however, Australia was replaced by a railway and tramway map of Sydney. The book contained timetables, advertisements (mainly travel related), fares (from both Sydney and Newcastle), conditions of travel, connecting coaches and, strangely, much information about parcels and goods consignments. The timetables are arranged in this order: Southern mainline and branches, Northern mainline and branches, Western mainline and branches, Suburban. Winter and Summer editions were published each year in May and

October respectively. In either 1906 or 1907, the order of the timetables was changed, so that Sydney Suburban

came first, which seems sensible as there would have been more users of these lines.

... To be continued ...
